ISO Survey – 2018 to 2024

https://www.iso.org/the-iso-survey.html

ISO publishes its survey of certifications to ISO management system standards every September. The table below shows the number of Certificates (and Sites) worldwide for universal and industry specific management system standards, from 2018. ***The industry specific standards are in italics.*** ISO published data for twelve standards for 2018 to 2020. From 2021, ISO added four more, and published data for sixteen standards for 2021, 2022 and 2024. The data for 2023 was incomplete, without data for ISO 28000.

NOTE The figures in previous surveys relied upon voluntary submissions from accreditation and certification bodies. Many did not submit figures. Consequently, the surveys have not been accurate but have illustrated the general trends of certifications to various standards. China did not provide figures for the 2023 survey which explains why the numbers are low. The figures for 2024 are based upon notifications of certifications to the IAF CertSearch database (which has now become mandatory) but are again lack complete figures from China. The figures in the future, from the 2025 survey onwards, should hopefully be complete and substantially more accurate.

There are of course figures available for previous years but there are several reasons for concentrating on the numbers of certifications from 2018 onwards.

(a) ISO published revisions of ISO 9001 and ISO 14001 in 2015, based upon the High Level Structure (HLS), with a 3 year transition ending in 2018.
(b) ISO published ISO 45001 in 2018, replacing OHSAS 18001.
(c) ISO published a revision of ISO/IEC 20000-1 in 2018, based on the HLS.
(d) ISO started to report the number of certifications to ISO 37001 in 2018.
(e) ISO made changes in 2018 to how it compiles and presents the figures.

ISO 37001 Certifications – 2018 to 2024

The table below and to the right shows the number of ISO 37001 certificates, for countries with 6 or more certificates, in descending order of certificates, for 2024.
